Our Technical Team

Looking for some assistance with any of your projects? Our technical and design experts are here to help, just follow the three simple steps below;

3 STEP DESIGN SERVICE

1. Send your plan along with a short brief to tech@sycamoreLED.com
2. Our experts design the perfect lighting scheme for your project
3. You receive a quotation including a full list of products ready to order

Or fill out the dedicated form on our website!

Bespoke Lighting Service

Our technical and design team also offer a bespoke lighting service.

For further details please contact our team using the email address below, or call us to see how we can help.

tech@sycamoreled.com
tel: 0113 2866686

5-Year Warranty

At Sycamore, we stand behind the quality and reliability of our products. That's why we offer a 5-year guarantee* on the majority of our range, ensuring peace of mind for our customers.

*Certain products are not included in this guarantee, as indicated on the relevant catalogue pages. Please refer to the product-specific information for further details.

For full terms and conditions, please visit our website.

Our New Showroom

Our beautiful new showrooms are now open for business!

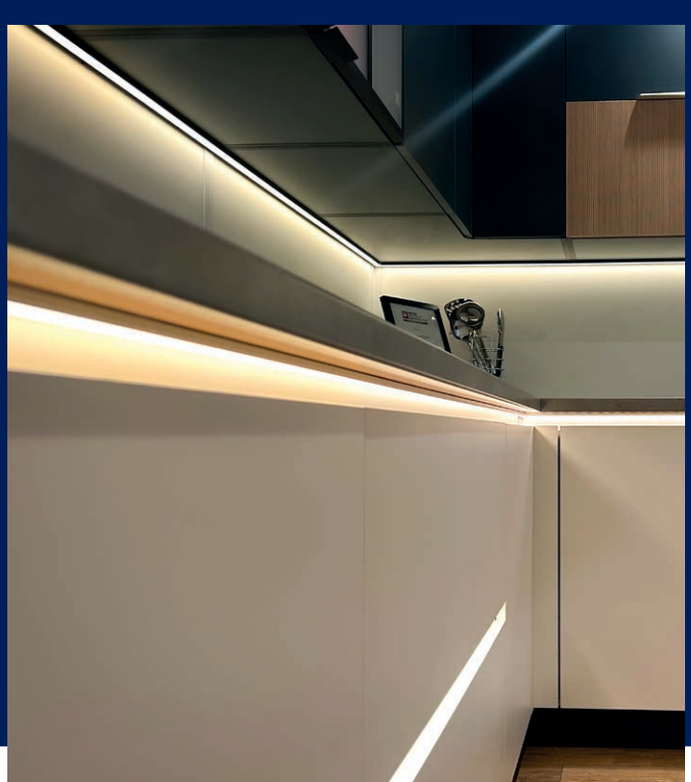
Our technical team have worked their socks off to build our new kitchen and bathroom showrooms, which are jam-packed with all the very latest in lighting technology, along with stylish designs and impressive lighting control systems to suit all installations.

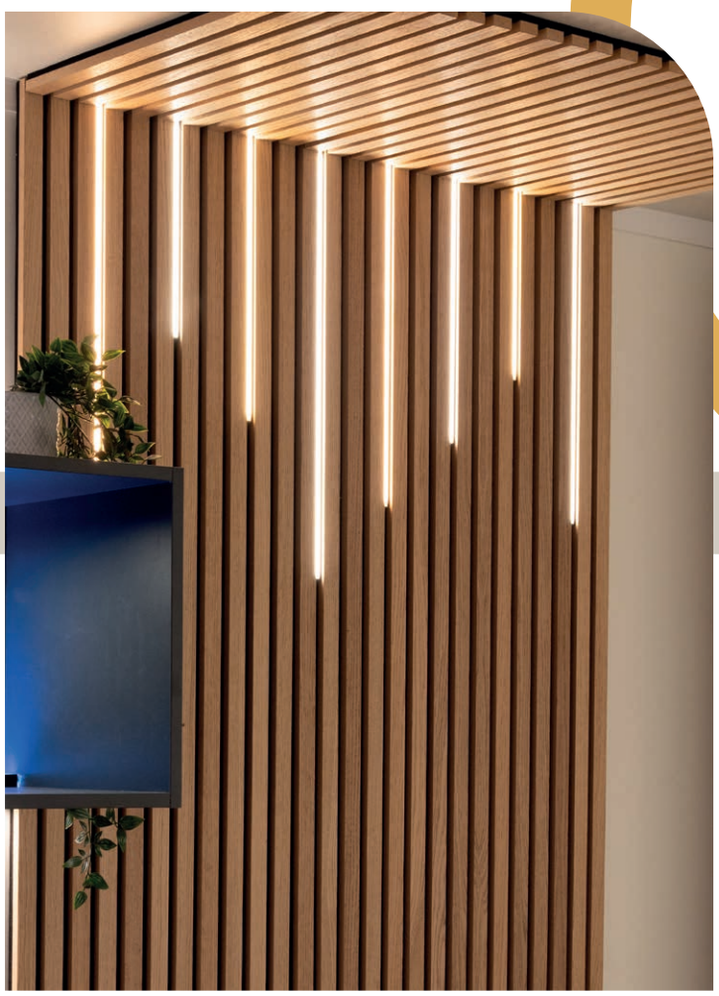
To arrange a tour, please give us a call or contact your regional sales manager!

Clever use of LED strip...

Create a modern linear look using LED strip in different areas of the kitchen. This type of lighting looks especially good on handle-less kitchen designs, and emphasises the smart, clean style.

Tunable LED strip can also be used, enabling the user to change the colour of the lighting, and even dim to create a bespoke lighting scheme depending on the mood required!.





Unique Designs!

Our technical team love to create extraordinary designs for our customers.

Our new wood panelled wall has been fitted with LED strip, in a unique pattern to create a stunning effect.

These type of walls could also be fitted with RGB colour changing LED strip to add even further wow factor!.

Stunning illumination within cupboards

The popularity of built in gin bars, or larder units is growing, and these units can be completely transformed with the use of LED Flexible strip.

Our new colour changing pixel strip features a new technology which controls the LED chips separately, so different colours can be set within just one length of strip. The ultimate wow factor for a show-stopping feature in any kitchen!

Style Guide

Cabinet Lighting

In-cabinet lighting can offer several practical and aesthetic benefits, enhancing both the functionality and appearance of your space.

Placing lighting inside cabinets, also makes it easier to find items hiding in the back of your cupboards! Pair with a door sensor to automatically switch the lights on and off for ease of use, and energy efficiency.

Under cabinet lighting should be stylish, yet functional. All our under cabinet lights feature a wide beam angle which floods worktops with light - essential for areas used for food & drink preparation!

HINTS & TIPS

- When deciding where to place your kitchen lighting, it's important to consider both functionality and ambiance. The ideal placement for kitchen cabinet lighting should focus on key areas where you need the most visibility, before adding any ambient or mood lighting.
- Choosing the right colour temperature for LED lighting in your kitchen is important for both functionality and ambiance. The colour temperature is measured in Kelvin (K), and it can significantly affect the mood of the space. Natural White (4000K) is a popular choice and suits any type of kitchen design, whether modern or traditional. Warm White offers a slight yellow tone, creating a cosy and inviting space.

Solaris Diffused LED

Diffused LED so no visible LED Points

Super Slim discreet and compact

120° **Beam Angle** for a bright spread of light

Style Guide

LED strip lighting

Under Cabinet. Placing LED strip under cabinets is a great way to enhance task lighting in a kitchen. The continuous light output creates a seamless look, avoiding a “spotting” effect. Perfect for minimalist designs!

Kitchen Island. LED Strip around an island can enhance both the functionality and aesthetics of a kitchen. Paired with a simple lighting control system, these lights can be dimmed to create ambience for a cosy, relaxing atmosphere. Place under the worktop, around the plinth or both!

Need some help?

Our technical team can assist with;

- Bespoke Lighting Design
- Product Technical Queries

Can’t find what you are looking for?

We offer a bespoke lighting service - LED strip and extrusions cut to size, please ask us for more details!

Larders, Cupboards & Shelves.
Adding LED strip within these areas can provide extra illumination, great for highlighting decorative items, or brightening up dark cupboards and cabinets.

Why LED Strips work well in a kitchen

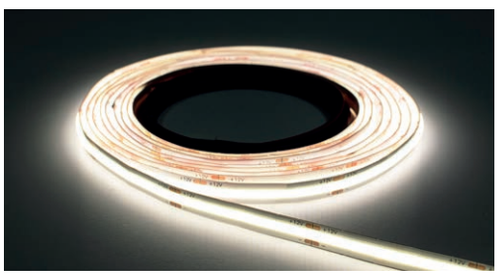
- **Linear Illumination.** The continuous light output provides a seamless look, avoiding the “spotting effect”.
- **Customisable Lengths.** LED Strips can be cut at small intervals, ensuring a perfect fit under cabinets or around kitchen islands.
- **Energy Efficient.** LED Strips consume less energy, whilst delivering bright, focused light.
- **Colour Options.** Available in warm, natural or cool white to suit any type of kitchen design. They are also available in a tunable white option, or for an added wow-factor, RGB colour changing.

5 YEAR GUARANTEE

LED Strip for Acoustic Wall Panels

NEW!

Transform your Acoustic Panels by installing our COB LED Strip within a slick black aluminium extrusion.



Installing in our black profile blends in with acoustic panels.

Combine with our wireless lighting controls for complete flexibility

White, Tunable or RGB

Choose from warm or natural white, tunable white or RGB colour changing

Slim Surface Mounted in black

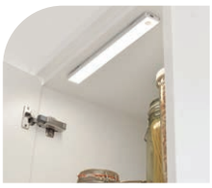
Style Guide

Plinth, Drawer & Shelf Lighting

Illuminated Shelving is easily installed using hanging brackets, and are available in various sizes. Stylish and modern, they also provide extra ambient lighting to a kitchen.

Plinth lighting is a fantastic way to add an extra dimension to a kitchen! Installed under cabinets at floor level, they can make a room appear more spacious, and add a modern, layered lighting effect.

Battery lighting can be installed within cupboards and cabinets to provide extra illumination in hard to reach places. No wiring is required, so they can be retrofit, or added to areas without any power. They are simple to install, and are easily removed for charging using magnetic brackets.



Drawer lighting is great for adding extra illumination to deep pan drawers, making it easier to locate items inside. Our drawer lights also feature a built-in sensor, so switch on and off automatically when the drawers are open and closed.

Plinth Lighting

Diffused LED so no visible LED Points

Style Guide

Pendant Lighting

Choosing the right pendants for your kitchen

Choose pendants that complement your kitchens overall design.

- Industrial style pendants work well in modern or industrial kitchens
- Glass or metal pendants suit a sleek minimalist look
- Glass pendants can make a kitchen feel open and bright
- Consider size - large pendants can make a bold statement but can overwhelm a smaller kitchen.

Consider placement

- Kitchen island - use odd numbers (ideally three) for symmetry and balance. Space them out evenly, and place them high enough to avoid obstructing views. All our pendants have adjustable cable so can be positioned to suit their environment easily.
- Dining tables - Place centrally over the table, again taking into consideration the height of the pendant so that there are no obstructions.
- Over a sink or work area - placing a single pendant here can provide extra task lighting

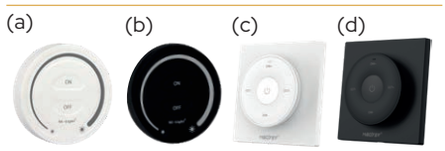
Wall Panels



These panels can control 1 zone of lighting. They can be used to turn lights on and off, or dim to suit. Multiple receivers can be paired to one controller.

These panels require no wiring, and include an adhesive back to stick the to the wall.

The round switch in model (c) & (d) can be removed and used as a hand-held remote, simply detach from the magnetic base.

Round Wall Panels (Single Zone)
(a) White - SY8817W
£20.16
(b) Black - SY8817B
£20.16
Detachable Round Wall Panels (Single Zone)
(c) White - SY8818W
£25.20
(d) Black - SY8818B
£25.20

Lighting Controls

Door, Swipe & Dimming

Door/Swipe Sensor

Finish: White
Power Supply: 12/24Vdc
Cable Length: 2m (Input & Output Cables 1m)
Max Current: 10A
Sensor Range: Up to 70mm
Wattage: 12Vdc 100W/24Vdc 200W
IP Rating: IP20
Mounting: Recessed or Surface
Guarantee: 12 Months

Glossary of Icons & Technical Data

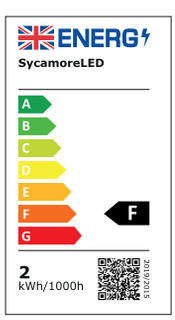
CE	Indicates the compliance with the low voltage and electromagnetic compatibly
UK CA	Indicates the compliance with the applicable requirements from products sold within the UK.
	Class I lighting: includes earth protection as a complementary security measure against electrical shocks
	Class II lighting: includes a reinforced or double insulation as a protection against electrical shocks
III	Class III lighting: the protection against electrical shocks comes from the supply of very low voltage tension
F	Suitable for installation on normally combustible surfaces
M	Suitable for use in furniture
	For indoor use only
	WEEE Compliant
ROHS	ROHS compliant

ERP Directive

ERP Directive effective from 5th December 2019, commission regulation (EU) No 2019/2020 laid down new eco-design requirements for light sources and separate control gears.

Furthermore, the energy labelling was newly regulated and simplified in scope and was introduced for light sources from 1st September 2021.

A typical ERP label is shown.



EnabLED

LEDs and LED controls are the future of lighting, and as LED capabilities continue to evolve and expand, new markets are opening up all the time. Developing new, innovative solutions for tomorrow's new LED applications takes significant investment in research and design, so by joining the EnabLED licensing program, Sycamore LED has gained access to over 490 Signify inventions and patented technologies, which we can now build into our own products. With access to these cutting-edge technologies, we can gain greater freedom to design optimal solutions for our products. We can shorten our time to market and also achieve an excellent balance of cost-to-quality including cost-effectiveness in our component sourcing.

Please visit www.signify.com/enabled to confirm which companies are currently licensed in the scheme and what the EnabLED licensing program covers in more detail.

Colour Appearance and Colour Temperature

The most common terminology is to classify colour temperature as one of three options. These being warm white (approx 3000k), natural white (approx 4000k) and cool white (approx 6000k).

Colour Rendering Index (CRI)

This is a figure that indicates the accuracy of the reflective surface colour of an object when subjected to artificial light. For example an object in daylight on a reasonably sunny day will be subject to a CRI of 100 from the light source, which in this case would be daylight, the sun. Theoretically the colour of an object will be 100% true.

Once the same object is placed into a dark room and a light fitting with a CRI of 85 is illuminating it, then the colour of that object will be 85% of its true colour. Therefore the higher the CRI, the more accurate the colour.

Colour temperature has a bearing on this as a white object would appear "yellow" if illuminated by a warm white light source. Careful consideration has to be taken to ensure that the correct type of light with the correct CRI and colour temperature is selected for any given installation.

A CRI of 80 is the minimum standard.

Total Lumens

This relates to the amount of light (lumens) emitted from a light fitting in relation to the amount of power it uses to create this output. There are now regulations in place that state minimum lumens per watt criteria and any lights that do not conform aren't able to be used in certain applications. Advice should always be taken to ensure that the correct lighting is used on any installation.

Beam Angles

The beam angle of a light fitting allows the installer to determine the spacing of light fittings as to achieve the most uniform, consistent lighting onto the desired area.

Terms and Conditions

1. DEFINITIONS: a) The ''seller'' means Sycamore Lighting Ltd. b) The "buyer'' means the person who buys or agrees to buy the goods from the seller. c) The 'goods' means all items which the buyer agrees to buy from the seller.

2. GENERAL: Orders are only accepted subject to the Conditions of Sale set out below and the seller shall not be bound by any other terms, written, verbal or implied, or which are conditions customary in the trade and whether contained in customer's order or not. These conditions shall apply unless expressly varied by the seller in writing.

3. TERMS: Credit accounts are nett strictly within 30 days. Interest at a rate of 8% per annum above Bank of England base rate, together with any expenses incurred in collecting payments, will be added to the agreed price in respect of any part thereof not paid, on or before the due date. Where a new account is to be opened two trade references are required. The seller has the right to discontinue delivery without notice if the buyer defaults in payment, or if circumstances warrant such discontinuance. The seller also has the right to refuse credit terms to a buyer for any reason. Pro-forma orders will only be delivered when the seller has received payment in full, including confirmed clearance of any cheque.

4. PRICES: Whilst every endeavour will be made to deliver at the prices quoted, the seller reserves the right to invoice at the price ruling at the date of delivery. All prices are subject to VAT at the rate prevailing at the date of invoice.

5. RISK AND DELIVERY: a) Goods are delivered to the buyer when the seller makes them available to the buyer (or any agent of the buyer) at the sellers premises or other delivery point agreed by the seller and risk in the goods passes when they are delivered to the buyer. b) The seller shall not be liable for any penalty, loss, injury, damage or failure in delivery from any cause at all nor shall any such delay or failure entitle for any buyer to refuse to accept any delivery or to repudiate the contract. c) Any dates quoted by the seller for delivery of the goods are approximate only and shall not form part of the contract and the buyer acknowledges that in the performance expected of the seller no regard has been paid to any quoted delivery dates.

6. CARRIAGE AND ADMINISTRATION CHARGES: A carriage charge of £8.50 will be added to all invoices on orders of under £150.00 excluding VAT to UK mainland addresses. All offshore islands and EC countries will incur a separate delivery charge, based on the weight of the total order. Please note administration and delivery charges are subject to change without prior notice.

7. CLAIMS: Claims must be notified in writing within seven days of receipt, otherwise responsibility cannot be accepted. The seller's liability shall be limited to, at the seller's option, replacing the goods or refunding the price of the goods. Under no circumstances shall the liability of the seller exceed the price of the goods. Replacements for damaged goods will be charged and credit issued on the return of the damaged goods to the seller in the original packaging.

8. RETENTION OF TITLE: a) In spite of delivery having been made, property in the goods shall not pass from the seller until payment in full of the price by the buyer. B) Not withstanding delivery, property in the goods shall not pass from the seller until all other sums owed by the buyer to the seller have been paid in full. c) Until payment in full for the goods, the buyer shall hold the goods on a fiduciary basis as a bailee for the seller. d) Whilst the buyer has the right to dispose of the goods in the ordinary course of business on a bona fide sale without notice to the customer of the seller's rights hereunder, the entire proceeds of sale or otherwise of the goods shall be held in trust for the seller until payment in full for the goods. e) Until payment in full for the goods the buyer hereby grants the seller the right to enter any premises where the goods are stored in order to re-possess or inspect them.
9. BREACH AND INSOLVENCY: If the buyer breaches any condition of this contract or becomes subject to an Administration Order or becomes bankrupt or has a receiver appointed for or distress is levied on any part of its assets or business or goes into liquidation or makes any composition with its creditors, the seller shall be entitled (whether in respect of this contract or any other) to: a) Withhold any further deliveries to the buyer and/or cancel the contract without liability; b) Appropriate any payment made by the buyer to such of the goods (whether supplied under this contract or any other) as the seller shall think fit; c) Immediate payment of all sums whatever, owing by the buyer to the seller notwithstanding any previous agreement to the contrary; d) Exercise any of its right pursuant to clause 8 above.
10. PRODUCT INFORMATION: Although the seller shall use its best endeavours to ensure that the information contained in the seller's catalogue is correct at the time of going to press, the seller shall not be under any liability for any damage, loss or expense resulting from any error or omission contained in the seller's catalogue. Goods supplied may vary in detail from the illustrations, drawings and descriptions (which are approximate and for guidance only) in the seller's catalogue as a result of improvements or modifications. Colour finishes will be maintained as accurately as possible, but matching cannot be guaranteed.
11. FORCE MAJEURE: The seller shall not be liable for any default due to any act of God, war, strikes, lock-outs or other industrial action, difficulties in obtaining labour or parts, government or other restrictions or regulations or other event beyond the reasonable control of the seller.
12. LAW AND JURISDICTION: All disputes arising out of or in connection with the contract shall be governed by English law and the buyer accepts the jurisdiction of the Courts Of England.
13. RETURN AND RESTOCKING: When goods are agreed for a return or cancellation the buyer shall pay a handling or restocking charge to cover administration and inspection charges involved in reprocessing products back into stock. The charge will be subject to change without prior notice but is currently 25% of the invoiced value of the goods. Non standard and special items ordered by the buyer cannot be accepted for return.
14. GUARANTEES: Refer to individual product specification. Terms and conditions apply to the guarantees, and lamp life of our products. Please refer to our website for further details.

15. CUT OUT SIZES AND DIMENSIONS: These are correct at time of printing. We do not recommend any holes are cut until goods are received and checked.

The company reserves the right to alter technical details without prior notification.
